WORK EXPERIENCE

Fullstack Engineer | BeneNAV

Nov 2025 – Present

- Developed and maintained features across the company's HR/employee-management dashboard (**React, MUI, Redux Toolkit**) and its **backend API (Node.js, Express, TypeScript, MongoDB)**, resolving bugs across both the **frontend** and the data layer.
- Built and published an internal shared **TypeScript models package** consumed by both the **frontend dashboard** and **backend API**, keeping data types consistent across the **fullstack** codebase and reducing duplication.
- Designed and developed reusable components for the company's **Storybook-based UI component library**, translating **Figma** designs into production-ready, cross-platform components.
- Integrated real-time features using an **Elixir/Phoenix**-based chat service for live messaging/notifications.
- Diagnosed and fixed bugs on the company's marketing site (**React, Vite, TypeScript, Tailwind CSS**), improving stability and UX.

QA Engineer | DevsData

Jan 2025 – Present

- Execute comprehensive manual and exploratory testing across **frontend** and **backend** systems, identifying and documenting critical bugs that improved application stability.
- Design and implement detailed **test cases** covering edge cases and user workflows, ensuring **95%+** test coverage for new features.
- Collaborate with development team through **Agile** ceremonies to prioritize and resolve 50+ issues monthly.
- Perform **API testing** using **Postman**, validating request/response patterns and authentication flows.
- Conduct **cross-browser** and **cross-device testing** to ensure consistent user experience across Chrome, Firefox, Safari, and Edge.
- Manage version control workflows using **Git/GitLab** and track defects through **Trello**.

PROJECTS

eCommerce Web Application (C#, ASP.NET Core Web API, React, PostgreSQL, JWT, PayPal API, Postman):

- Developed full-stack platform with product catalog, shopping cart, and secure checkout functionality
- Implemented JWT authentication, PayPal payment integration, and comprehensive RESTful API with 20+ endpoints
- Built responsive React frontend with real-time cart updates and optimized database queries

Video-Platform (C#, ASP.NET Core Web API, PostgreSQL, React, Postman):

- Created video-sharing platform with upload, streaming, and user engagement features (comments, likes)
- Built scalable backend API handling video metadata and user interactions with optimized PostgreSQL queries

Blogs-Application (C#, ASP.NET MVC, MSSQL)

- Developed blogging platform with user authentication, CRUD operations for posts, and interactive comment system
- Applied MVC architecture with normalized database design, tested endpoints using Swagger

MyPostman (Clone of Postman Application) (C#, .NET 8, HTTPClient, WinForms, JWT Auth)

- Built desktop API testing tool supporting all HTTP methods with JWT authentication and JSON response formatting
- Designed intuitive Windows Forms interface with request/response tabs and URL validation

SKILLS

- Technical Skills:** C#, ASP.NET Core, React.js, JavaScript, TypeScript, Node.js, Express.js, Redux Toolkit, MUI (Material UI), Styled-Components/Emotion, PostgreSQL, MongoDB, RESTful API Design, JWT Authentication
- Development Tools:** GitHub, GitLab, Postman, Figma, Storybook, Vite, Slack, Notion, Swagger, Trello, Visual Studio, Visual Studio Code, n8n
- Testing & QA:** Manual Testing, API Testing, Test Case Design, Cross-browser Testing, Bug Tracking
- Core Competencies:** Data Structures & Algorithms, Database Design, Agile/Scrum, Problem-Solving, Team Collaboration

EDUCATION

Bachelor in Computer Science | Kutaisi International University

2023 - 2027

- Relevant Coursework:** Data Structures & Algorithms (Java - 4.0 GPA), Database Systems (PostgreSQL - 3.7 GPA), Software Engineering, Web Development, Computer Architecture

.NET Back-End Development Course | TBC IT Academy

2024 - 2025

- Completed intensive bootcamp covering ASP.NET Core, Entity Framework Core, Clean Architecture, MediatR, and industry best practices
